Automating Business Processes with EFT™ SMB

AUTOMATE, OPTIMIZE BUSINESS PROCESSES

Delivering data using manual processes is vulnerable to workforce limitations, vacations, turnover, and simple human error. Automation allows you to deliver data without manual intervention, saving time and avoiding potential errors. Enhanced File Transfer™ (EFT™) SMB enables you to streamline business processes without limitations imposed by legacy systems and applications. With an intuitive interface, administrators can easily create sophisticated, automated transfers.

Event Rules are based on a simple premise: an event occurs that triggers an action. In the EFT administration interface, you can specify Actions (e.g., send an email) to occur when an event (e.g., file upload) takes place. Additionally, you can specify one or more conditions (e.g., specific IP address connected) that must exist before an Action is taken or that change the Action that is taken.
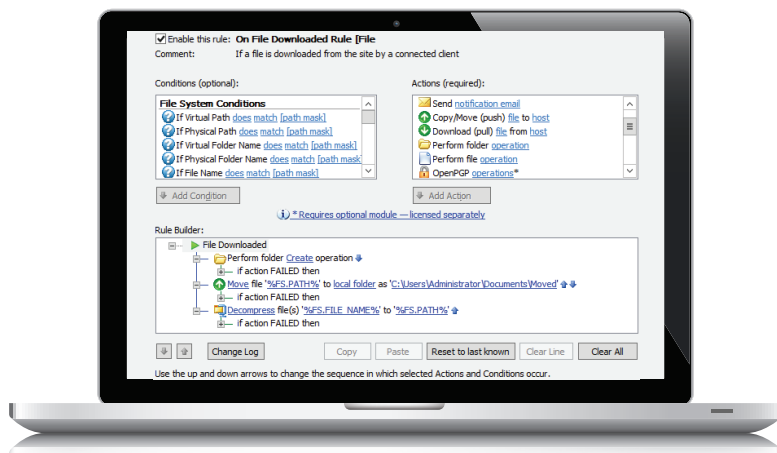

KEY FEATURES:

- Run executables, batch files, and scripts as specific events occur
- Send notification email when specific event occurs
- Granular control of event triggers based on connection, file system, user, server, site, and Workspaces conditions
- Additional modules provide folder monitor and timer events and file transfer client actions

Built in to EFT™ SMB:

- Run executables, batch files, and scripts as specific events occur
- Send notification email when specific event occurs

With the addition of modules:

- Perform OpenPGP operations as files are uploaded or downloaded (requires OpenPGP module)
- Copy/move/download files automatically (requires File Transfer Client module)
- Generate reports (requires Auditing and Reporting module)
- Monitor folders for changes (requires Folder Monitor module)
- Schedule events to occur on specific dates, times, days of the week, days of the month (requires Timer module)

ABOUT GLOBALSCAPE

Globalscape is an innovative software company that secures mission-critical exchanges of data across multiple platforms - including remote and mobility solutions - for businesses worldwide. Through superior software, standards compliance and experienced, reliable support, Globalscape secures information exchange for individuals, global enterprises, governments, and small and medium enterprises across a wide range of industries.
